

UMF Series

Ambient Temperature Range : -30°C ~ 170°C

UMF Series is a molding type thermostat that provides superior resistance against shock, vibration, and environmental contaminations.

It is commonly used in automotive compressor and HVAC applications.

Applications

- Automobile Air conditioner Compressor
- Radiator Heater
- Boiler

Features

- Epoxy Molded
- Hermetic Surface
- Lead wire and terminal can be attached upon order
- Lead Wiring Available Upon Request

Specifications

- | | |
|-------------------------------|----------------|
| ● Electrical Ratings | 15A / 125V AC |
| | 7.5A / 250V AC |
| | 8A / 12V DC |
| ● Operating Temperature Range | -20°C ~ 170°C |
| ● Life Cycles | 100,000 Cycle |
